

Introduction to Pro/INTRALINK 9.0/9.1

Course Code	TRN-2137-T
Course Length	2 Days

Overview

In this course, you will learn how to complete basic Pro/INTRALINK functions including how to access and navigate the Pro/INTRALINK environment, locate and view product information, complete assigned tasks, as well as use Pro/INTRALINK's communication and collaboration tools. You will also learn the key capabilities and features of Pro/INTRALINK CAD Data Management and how to use Pro/INTRALINK to manage Pro/ENGINEER design information. Specifically, you will focus on the day-to-day data management tasks required by the Pro/ENGINEER user community.

You will complete Pro/FICIENCY skills assessment questions for each module. These questions are used to help reinforce your understanding of the course topics and form the basis for daily review sessions.

After completing the course, you will be prepared to complete basic Pro/INTRALINK tasks and activities, manage Pro/ENGINEER design information, as well as have a better understanding of the Pro/INTRALINK system implementation at your company.

Prerequisites

- Basic browser and Web navigation skills.
- Basic understanding of Product Data Management processes and deliverables.
- Working knowledge of Pro/ENGINEER Wildfire 3.0.

Audience

This course is intended for end users and System Administrators. The topics in this course are also available as Web-based training courses.

Topics

- Introduction to the Pro/INTRALINK Environment
 - Locating Information
 - Viewing Information
 - Getting Started with Pro/ENGINEER Data Management
 - Initiating New Designs and Sharing Design Information
 - Modifying and Managing Design Information
 - Understanding File Relationships and Dependencies
 - Managing Family Tables
 - Managing the Workspace Environment
 - Participating in Processes
 - Managing Standard Documents
-

- Managing Your Work
- Windchill 9.1 Enhancements

Agenda

Day 1

Module 1	Introduction to the Pro/INTRALINK Environment
Module 2	Locating Information
Module 3	Viewing Information
Module 4	Getting Started with Pro/ENGINEER Data Management
Module 5	Initiating New Designs and Sharing Design Information
Module 6	Modifying and Managing Design Information

Day 2

Module 7	Understanding File Relationships and Dependencies
Module 8	Managing Family Tables
Module 9	Managing the Workspace Environment
Module 10	Participating in Processes
Module 11	Managing Standard Documents
Module 12	Managing Your Work

Viewing Representations in ProductView Lite.....	3-16

Viewing Representations in ProductView Standard	3-17
Working with Representations	3-18
Using the Clipboard to View Multiple Representations	3-19
Lab Exercises	3-20
Exercise 1: Examining CAD Documents	3-20
Exercise 2: Examining CAD Document Structure	3-22
Exercise 3: Viewing and Annotating Representations	3-23
Exercise 4: Examining Documents	3-26
Summary	3-27
Getting Started with Pro/ENGINEER Data Management	
Introduction	4-1
Objectives	4-1
Lecture Notes	4-2
Pro/ENGINEER and Pro/INTRALINK Connectivity	4-3
Registering a Pro/INTRALINK Server	4-4
Pro/INTRALINK Integration	4-5
Pro/INTRALINK Integration: Pro/ENGINEER Menus	4-6
Pro/INTRALINK Integration: Model Tree	4-7
Pro/INTRALINK Integration: Folder Browser	4-8
Pro/INTRALINK Integration: Search	4-9
Pro/INTRALINK Integration: Browser	4-10
Pro/INTRALINK Integration: Event Manager	4-11
Introduction to the Workspace	4-12
Workspace Layout	4-13
Creating Workspaces	4-14
Changing the Active Workspace	4-15
Locating Design Information with Pro/ENGINEER	4-16
Searching for Design Information	4-17
Browsing for Design Information	4-18
Viewing CAD Document Information	4-19
Viewing CAD Document Content	4-20
Working with Workspaces	4-21
Changing Workspace Views	4-22
Customizing Workspace Views	4-23
New View: Set Name	4-24
New View: Choose Object Types	4-25
New View: Set Filters	4-26
New View: Set Column Display	4-27

New View: Set Sorting	4-28
Workspace Preferences: General	4-29
Workspace Preferences: Configuration Specification	4-30
Lab Exercises	4-31
Exercise 1: Registering a Pro/INTRALINK Server and Creating Workspaces	4-31
Exercise 2: Browsing and Searching for Design Information	4-33
Exercise 3: Creating Workspace Views	4-35
Exercise 4: Setting Workspace Preferences	4-37
Summary	4-37
Initiating New Designs and Sharing Design Information	
Introduction	5-1
Objectives	5-1
Lecture Notes	5-2
Sharing Pro/ENGINEER Designs	5-3
Introducing New Designs to the Workspace	5-4
Using Start Models and Templates in New Designs	5-5
New CAD Document	5-6
Workspace Save As	5-7
Introducing New Designs to the Commonsense	5-8
Check In	5-9
Commonspace Save As	5-10
Generating Viewables	5-11
Creating Representations	5-12
Monitoring Publish Jobs	5-13
Adding CAD Documents to the Workspace	5-14
Removing CAD Documents from the Workspace	5-15
Understanding Workspace Architecture	5-16
Understanding Save, Upload, and Check In	5-17
Understanding Web Browser Access to the Workspace	5-19
Understanding Administrative Configurations	5-20
Naming: Pro/ENGINEER	5-21
Naming and Numbering: CAD Document	5-22
CAD Document Naming and Numbering Policies	5-23
Parameter to Attribute Mapping	5-24
Lab Exercises	5-25
Exercise 1: Understanding Save, Upload, and Check In	5-25
Exercise 2: Initiating New Designs Using Save As in the Workspace	5-29
Exercise 3: Initiating New Designs Using Save As in the Commonsense	5-31

Exercise 4: Initiating New Designs Using New CAD Document	5-32
Summary	5-35
Modifying and Managing Design Information	
Introduction.....	6-1
Objectives.....	6-1
Lecture Notes.....	6-2
Modifying Pro/ENGINEER Designs.....	6-3
Modification Process: Check Out a CAD Document.....	6-4
Modification Process: Modify a CAD Document	6-5
Modification Process: Check In a CAD Document.....	6-6
Checking Out CAD Documents.....	6-7
Understanding Check Out Status and Options.....	6-8
Understanding Download and Check Out.....	6-9
Modifying CAD Document Attributes.....	6-10
Understanding Advanced Check In Options.....	6-11
Canceling Modifications.....	6-12
Workspace Status	6-13
Managing CAD Documents.....	6-14
Locking CAD Documents in the Workspace.....	6-15
Using Library Parts in Assemblies.....	6-16
Renaming CAD Documents	6-17
Moving CAD Documents	6-18
Revising CAD Documents.....	6-19
New Revision.....	6-20
Lab Exercises	6-21
Exercise 1: Checking Out and Modifying CAD Documents	6-21
Exercise 2: Using Library Parts in Assemblies.....	6-22
Exercise 3: Renaming CAD Documents	6-25
Exercise 4: Moving CAD Documents.....	6-27
Summary	6-27
Understanding File Relationships and Dependencies	
Introduction.....	7-1
Objectives.....	7-1
Lecture Notes.....	7-2
Managing Dependencies.....	7-3
Sample Dependencies	7-4
CAD Document Fundamentals for Models.....	7-5
CAD Document Fundamentals for Drawings.....	7-6

Viewing Dependency Information in Pro/INTRALINK.....	7-7
Processing Dependencies.....	7-8
Typical Data Management Problems.....	7-9
Regeneration Failures.....	7-10
Ghost Objects.....	7-11
Resolving Ghost Objects.....	7-12
Duplicate Names.....	7-13
Lab Exercises	7-14
Exercise 1: Understanding Basic Pro/ENGINEER File and CAD Document Relationships.....	7-14
Exercise 2: Resolving Ghost Objects.....	7-16
Summary	7-17
Managing Family Tables	
Introduction.....	8-1
Objectives.....	8-1
Lecture Notes.....	8-2
Family Table Overview.....	8-3
Viewing Family Table Information.....	8-4
Creating Family Tables.....	8-5
Managing Family Tables.....	8-6
Modifying Family Tables.....	8-7
Saving Family Table Items as New Items.....	8-8
Lab Exercises	8-9
Exercise 1: Creating Design Variations using Family Tables.....	8-9
Exercise 2: Replacing a Generic Model with an Instance in an Assembly.....	8-12
Exercise 3: Modifying Family Table Instances	8-14
Exercise 4: Modifying Family Tables.....	8-16
Exercise 5: Copying a Partial Family Table.....	8-18
Summary	8-19
Managing the Workspace Environment	
Introduction.....	9-1
Objectives.....	9-1
Lecture Notes.....	9-2
Deleting Workspaces.....	9-3
Understanding Workspace Objects.....	9-4
Updating and Synchronizing Workspace CAD Documents.....	9-5
Updating CAD Documents in the Workspace.....	9-6
Synchronizing CAD Documents in the Workspace	9-7

Importing and Exporting CAD Data	9-8
Exporting CAD Data	9-9
Importing CAD Data	9-10
Working with Offline Workspaces	9-11
Making Workspaces Available Offline	9-12
Restoring Offline Workspaces	9-13
Locking and Unlocking Workspaces	9-14
Exporting and Importing Workspaces	9-15
Understanding the Export and Import Process	9-16
Exporting a Workspace from the Source System	9-17
Importing a Workspace into Another System	9-18
Exporting a Workspace from Another System	9-19
Importing a Workspace to the Source System	9-20
Lab Exercises	9-21
Exercise 1: Conducting Concurrent Product Design	9-21
Exercise 2: Importing Assemblies into Workspaces	9-24
Exercise 3: Working with Portable Workspaces	9-25
Summary	9-26
Participating in Processes	
Introduction	10-1
Objectives	10-1
Lecture Notes	10-2
Participating in Processes	10-3
Process Controls	10-4
Setting Object State	10-5
Promoting Objects Using a Promotion Request	10-6
Viewing Promotion Requests	10-7
Creating Promotion Requests	10-8
New Promotion Request: Set Attributes	10-9
New Promotion Request: Collect Objects	10-10
New Promotion Request: Edit Object List	10-11
New Promotion Request: Select State for Promotion	10-12
New Promotion Request: Select Process	10-13
New Promotion Request: Define Participants	10-14
Completing Tasks	10-15
Completing Promotion Tasks	10-16
